**PhD work-** Structure and dynamics of lipid and protein aggregates using experimental and modelling tools

- In the first part of the thesis, we developed a detailed kinetic model of protein aggregation on phospholipid membrane surfaces. We use MATLAB as a key tool for (a) Solving the kinetic equations and optimization of parameters involved in the kinetics and (b) Image processing of microscopy and spectroscopy results.
- In the second part of thesis the focus was on, obtaining high resolution structural

information of protein aggregates on the membrane surface. We used atomic force microscopy (AFM) in dry and liquid mode extensively. To correlate protein and lipid dynamics with structural information, we used fluorescence techniques such as, confocal microscopy, fluorescence correlation spectroscopy (FCS), fluorescence recovery after photobleaching (FRAP) and stimulated emission depletion microscopy (STED).

Dear Madam,

**Sub.: Details of Revised Training Fee**

**Kind Attn.: Dr. Megha Agrawal, Secretary Science Council, Gurukul Mahila Mahavidyalaya**

We had sent our proposal on 06/09/2021 to organize Four Days Skill Development Programme (SDP) on Mushroom Cultivation for your esteem Institution. We had mentioned training cost as Rs.30,000.00 only. Due to an inadvertent mistake we had not conveyed the Amount of GST to be paid alongwith the Fee. The GST @ 18% will be charged as extra against the Training Cost. Thus, the total Training Cost will be Rs. 35,400.00 (inclusive all).

Kindly consider the revision and convey your consent, accordingly.

Thanking You,

Yours faithfully
